(54) **Optical interference filters**

(57) A multi-layer optical interference filter consists of a plurality of layers 1, 2, 3...r of polymer material. The layers may each be formed by solvent coating operations or dip coating techniques. To reduce the thickness of the multi-layer stack it can be drawn through a die 5.

FIG. 2

At least one drawing originally filed was Informal and the print reproduced here is taken from a later filed formal copy.
